# Browser Extension Security Audit

Objective: Identify, analyze, and remove suspicious or potentially harmful browser extensions.

Tools Used: - Google Chrome / Mozilla Firefox - Internet for checking extension reviews and permissions
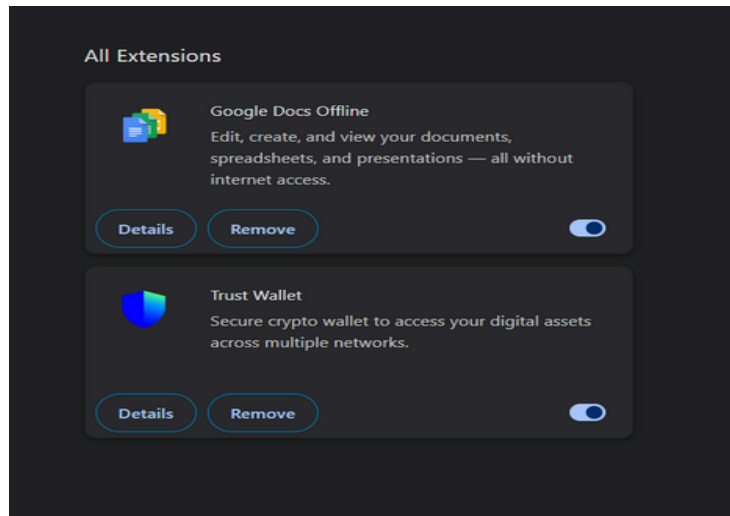

Steps Performed:
1. Opened browser extension manager.
2. Reviewed installed extensions.
3. Verified permissions and Web Store reviews.
4. Checked for unused or suspicious extensions.
5. No harmful extensions found, so no removals performed.
6. Restarted browser and confirmed normal performance.
7. Researched risks associated with malicious extensions.

Installed Extensions :
- Google Docs Offline (Safe)
- Trust Wallet (Safe)

verified all permissions and confirmed there is no a
unused or suspicious extensions

Conclusion: Browser environment is clean. No suspicious or harmful extensions detected.
